

Meet Zeb the Zebra Mussel!

I'm Zeb the Zebra Mussel. Let me tell you a little bit about myself...

- I'm a freshwater mollusc and I come from Europe, so I am non-native.
- I am NOT wanted in the Okanagan.
- When I was small, I was the size of a grain of sand and I floated free in water; I hitched a ride in water stored inside a 1, and that is how I got to Canada
- I like to live on hard surfaces like 1, docks, other animals and sometimes inside water pipes
- I eat a LOT and sometimes this means there is not enough food left in the lake for other animals in the water such as 2.
- I have sharp edges and if you step on me you could cut your foot.

The best way to keep Zeb away from your favourite beach is to help your parents Clean, Drain, and Dry your 1.
